MAGNETIC KNIFE BLOCK HOLDER USER MANUAL

We continue to be committed to provide you tools with competitive price.

"Save Half", "Half Price" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and dose not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

VEVOR[®]

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

PRODUCT PARAMETERS

Model	Product Size/mm	Function
GM23091	280×100×260	Double-sided magnetic suction

WARNING:

Please read this manual carefully before using the product. Failure to do so may result in serious injury.

USE PRECAUTIONS

1. This product is not a toy. Do not allow children to play with or approach this item.
2. Magnets create a wide, strong magnetic field. They can damage e.g. TV's, laptops, hard drives, credit cards, data mediums, mechanical watches, hearing aids and speakers.
3. Keep the magnetic bar with its built-in magnets away from all devices, which could get damaged by strong magnetic fields. A minimum distance of 60cm(23,5 inches) is recommended.
4. Use on flat, level, and hard surfaces only.

WARNING: Please note that this is a kind of magnetic suction wall hanging, relying on the suction of the magnet, so this kind of wall hanging is not suitable for non-magnetic suction tools, such as stainless steel tools, ceramic tools and other non-magnetic suction tools.

-Please note that when taking and putting the knife, try to hold the base with your hand to avoid accidental damage caused by the overturning of the knife base caused by excessive magnetic suction.

-When taking the knife, rotate the handle for 90° and contact with a small area to reduce the magnetic suction to prevent overturning, see the figure.

SAVE THESE INSTRUCTIONS

When taking the knife, rotate the handle for 90° and contact a small area to reduce the magnetic suction to prevent overturning, see the figure.

Cleaning

Clean the magnetic bar only with a dry or slightly moist cloth without any chemical substances. The bar is not dishwasher-safe.
