## **ELECTRIC CLIPPER**

## **USER MANUAL**

We continue to be committed to provide you tools with competitive price. "Save Half", "Half Price" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and does not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

**Technical Support and E-Warranty Certificate**  
**[www.vevor.com/support](http://www.vevor.com/support)**

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

Symbol	Symbol Description
	<p>Warning - To reduce the risk of injury, users must read the instructions manual carefully.</p>
	<p>This symbol, placed before a safety comment, indicates a kind of precaution, warning, or danger. Ignoring this warning may lead to an accident. To reduce the risk of injury, fire, or electrocution, please always follow the recommendations shown below.</p>
	<p>Indoor Use Only</p>
	<p>This product is of protection class II. That means it is equipped with enhanced or double insulation.</p>
	<p><b>Correct Disposal:</b>  This product is subject to the provision of European Directive 2012/19/EC. The symbol showing a wheeled bin crossed through indicates that the product requires separate refuse collection in the European Union. This applies to the product and all accessories marked with this symbol. Products marked as such may not be discarded with normal domestic waste, but must be taken to a collection point for recycling electrical and electronic devices.</p>

## 1. Important safeguards

When using electrical appliances, basic safety precautions should

always be followed including the following:

1. Read all instructions.
2. To protect against the risk of electrical shock, do not put the base in water or other liquid.
3. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the

appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

4. The product should be placed at places out of children's reach; never let those who are limb deformed, handicapped in sensor or mentality, or lack relevant experience and knowledge (including children) to use or play with this product.

5. The input voltage of this product is AC110-230V 50/60Hz and please confirm the voltage before using.

6. Make sure to cut off the power supply before disassembling, assembling or calibrating any part of the product.

7. This product adopts Y connection. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

8. Please check whether the power cable, plug, and other parts are damaged before using. In case of damage, please stop using it immediately and contact with the customer service department of the company timely, but never disassemble and repair by yourself, so as to prevent possible dangers. If this product needs to be repaired in the course of application, please contact with the Customer Service Department of this company in order to avoid risks or come to appointed maintenance point of this company to change. Be sure not to take apart or repair by yourself in order to avoid risks. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or is dropped or damaged in any manner.

9. In the using process, in case the product needs to be repaired, please contact with the customer service department of our company, or go to the repair point designated by the company directly, but never disassemble by yourself, so as to prevent possible dangers.

10. The appliance is intended for trimming purposes only. And only applicable for individual or family use.

11.  **WARNING: Keep the appliance dry.**

Please do not put the machine body into water or other liquids, or flush it under the water or other liquids (it works to wipe it with a soft cloth).

**SAVE THESE INSTRUCTIONS**

# HOUSEHOLD USE ONLY

## 2. FCC Information

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment!

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This product may cause harmful interference.
- 2) This product must accept any interference received, including interference that may cause undesired operation.

**WARNING:** Changes or modifications to this product not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

**Note:** This product has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the distance between the product and receiver.
- Connect the product to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for assistance.

## 3. Application Method

The shearing machine starts to work once the switch is pressed. Just use your thumb to press the switch if you want to shut it down. Then, the

shearing machine will stop working.

#### 4. Stepless regulation of supply voltage

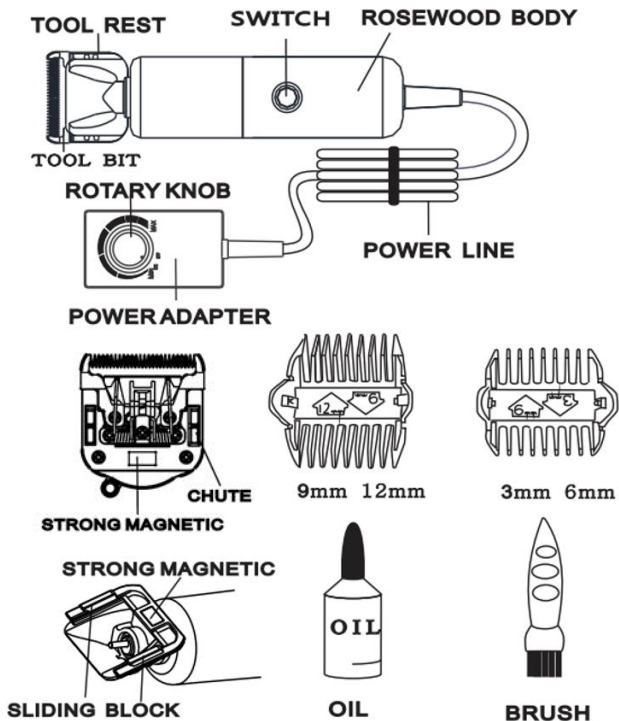

When the dot on the button points to OFF, the power is turned off. Turn the rotary knob clockwise and you will hear a click sound; when the dot is between ON and MIN, the power indicator is ON, indicating the clipper starts working with the output voltage being 6V and the motor running at the minimum speed. Continue to turn the rotary knob clockwise and the voltage rises continuously. When the dot points to MAX, the button stops, and the voltage then reaches up to 12V and the motor runs at the maximum speed. With the 12V output voltage, the motor power reaches the maximum value, providing the biggest cutting force. The higher the motor speed is, the faster the cutter gets worn and the more heat is produced. Hence, it is recommended to select the minimum speed in normal clipping conditions.

#### 5. Product features

Quality solid wood is adopted for the rear handle, making it shock absorbing, environmental and comfortable, while the front handle is made with aluminum alloy. The built-in series 5 high-power ball bearing motor contributes to its long service life, low noise and strong driving force. The adjustable power adapter adopted features high power, low heat, multiple

security protection circuit settings, the advanced technology of high-low voltage isolation and a wide voltage input range. With the precisely adjustable button, the input voltage can be changed continuously, thereby changing the motor speed, making the cutting head work at the most suitable speed and enhancing the service life of the cutters. The cutting head adopts the patented design of the rear earth magnetic structure, making it reliable and easy to dismantle.

## 6. Product Specification

1. Power Supply: AC100 - 230V 50/60Hz, 1A, MAX200W
2. Model: MDB-22
3. Plug type: US and EU
4. Motor speed: 6000rpm
5. Product Size: about  $\phi 45 \times 175\text{mm}$

## 7. Lubrication

The lubricating oil should be added to the friction parts of the blade in the tool bit every time before use. It is very important to add lubricating oil to the blade. It not only can improve cutting performance, but also can extend its useful life.

## 8. The Disassemble of Tool Bit

Handle the body of the shearing machine with your right hand, use your forefinger, middle finger and third finger of the left hand to withstand the teeth of the tool bit, press on the steps of the tool bit with your thumb of your left hand, and then press it down. The tool bit can be disassembled.

## 9. The Usage of the Comb

Here are two combs and each has two sizes. The four sizes: 3mm, 6mm, 9mm and 12mm.

Choose the right comb and hold it with your left hand. The selected one should be put forward, then use your right hand to hold the electric hair cutter in a slightly sloping way. In order to make the hanging column at the right side of comb, insert it into the hanging slot of the tool bit. Afterward, slightly lift the comb up to make the other hanging column into the other side.

If you want to disassemble the comb, hold the shearing machine with your right hand. In the meantime, use the finger of your left hand to hold the comb. Pull the plate of left comb with your left thumb to keep its left side and the tool bit apart first, and then take the whole down.
