! WARNING!

Read this material before using this product. Failure to do so can result in serious injury.

1. This product is not a toy. Do not allow children to play with this item.
2. Use as intended only.

2. Product Introduce

The main material of the door sealing strip is rubber, which mainly solves the problems of the door is not sealed, dust, insects, outdoor noise, temperature insulation, heat preservation and other problems; It is mainly installed in three parts: the gap under the door, the gap between the door frame and the wall, and the gap between the door frame and the door. There will be different products for different opening ways of the door.

3.Accessories

4.Installation Introduction

1. Lay seal on floor in position under door, mark seal position on floor, and cut the seal to length.
2. The floor should be cleaned with a scrubbing brush and detergent and left to dry (any contamination on floor will compromise, performance of

adhesive, i.e oil, grease or wax).

3. Close door with seal underneath it Fig.1, and position seal as shown on Fig.2. and Fig.3 and mark the floor for location of seal.

4. Apply glue to the sealing position of the bottom plate in Figure 3, and then install the seals.

5. Insert the "T-shaped heads" at both ends of the sealing strip into the two guide grooves of the aluminum base plate, slowly inserting from one end of the aluminum base plate to the other end. If the doors and windows are not equipped with aluminum bottom guide rails, it is necessary to fix the aluminum bottom guide rails with screws before installing the sealing strip.
