Mounted Cat Shelf Installation Instructions

We continue to be committed to provide you tools with competitive price.

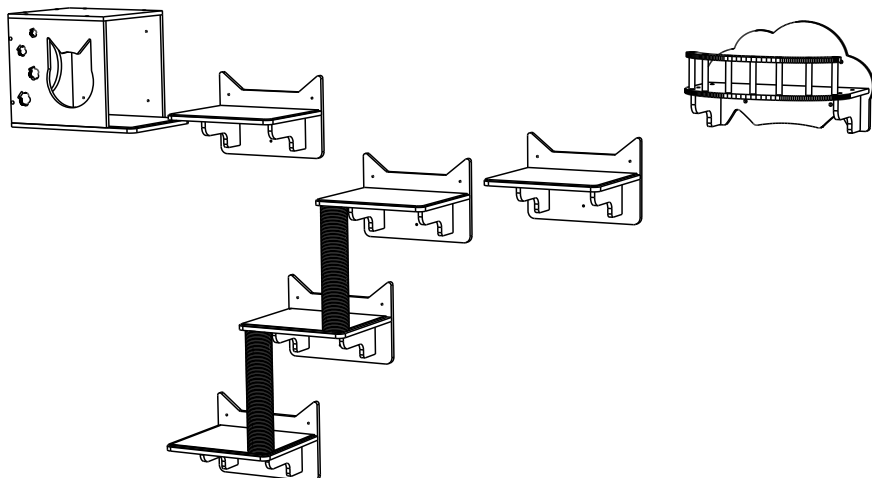

"Save Half", "Half Price" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and does not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

Assembly Instructions

TIPS:

- 1.The number of screws marked above is the actual number used during installation. When the product is shipped, 1~3 more screws of each type will be given as spares.
- 2. During the use of the product, children are prohibited from approaching without the company of adults.
- 3. The edge of the product is a bit sharp, and you need to wear gloves for installation; at the same time, it comes with sandpaper, so you can polish the edge again by yourself; without gloves, be careful when touching the running wheel.
- 4.Do not tighten the installation screws at once. Tighten the installation screws twice after all screws are aligned
- 5.It is recommended that two or more people install the device

6.Please use the following tools to install

Tape measure

Scissors

Marker pen

screwdriver

Electric drill

Please mark the position on the wall against the plate, reserve about 30cm distance between the jump platforms, drill the hole and bury the expansion tube
(A 6mm drill bit is used for solid walls and a yellow expansion tube is embedded; a 9mm drill bit is used for hollow walls and a butterfly expansion tube is embedded)

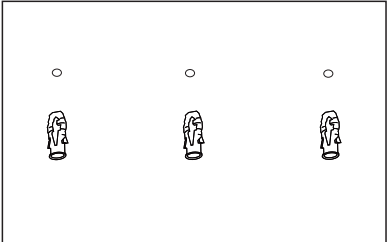

Expansion solenoid

Butterfly solenoid

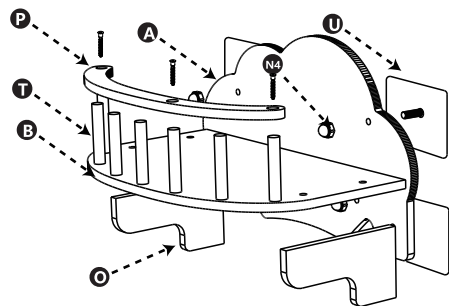

M4*70

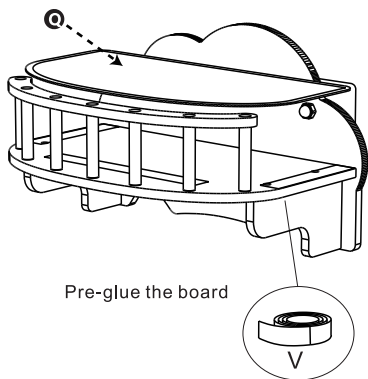

Assembly Instructions

STEP 1

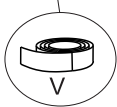

Install the fence table as shown
(note that this part is mounted on the glass wall)

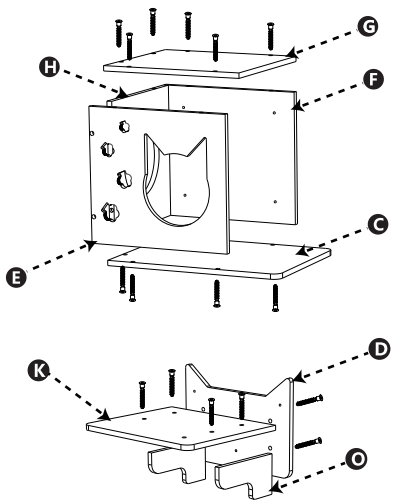

STEP 2

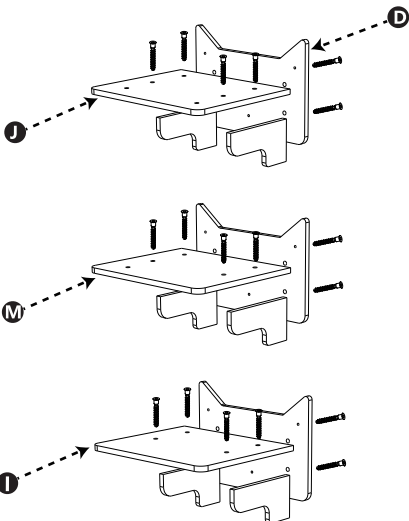

Pre-glue the board

STEP 3

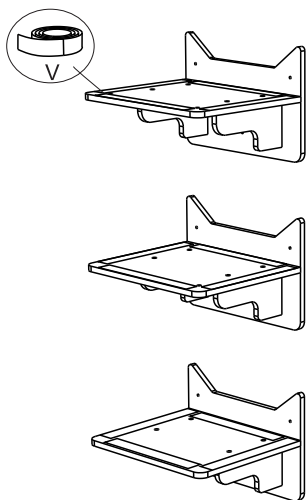

The picture shows a jumping platform and a cat's nest

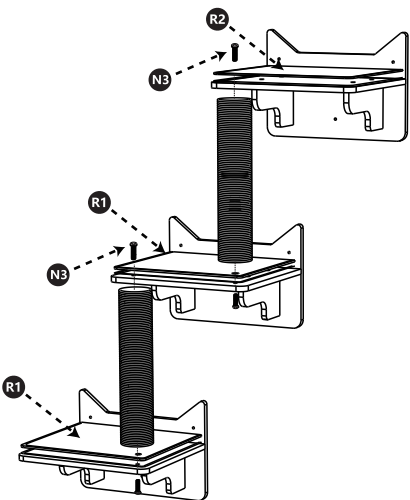

Assembly Instructions

STEP 4

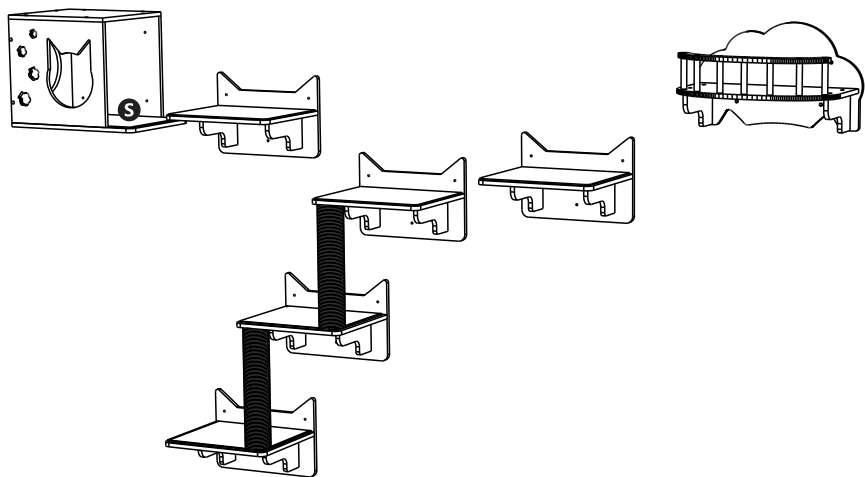

Put back glue on all four sides of the jumps

STEP 5

The jumping platform is fixed to the top ring and connected to the pole

STEP 6

All parts are nailed to the wall
(The installation distance of each component should be within 30cm)
