This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

LIFESPAN

Two filters can purify 6000 Gallons of drinking water. The filter should be replaced every 6 months, depending on the water quality.

BEFORE USE

PRIME THE FILTER.

1. Press rubber priming button (tan or black colored) onto the stem of the purification element with the small end facing the element.

2. Place the stem of the (tan or black colored) onto the element between fingers and press large end of priming button against faucet.

3. While holding priming button against faucet, turn on the cold water gently, allowing water to fill the cavity of the replacement filter.

4. Allow the exterior wall of the replacement filter element to sweat beads of water for about 5 seconds.

5. Rinse process dust from exterior of purification element. The element has now been successfully primed. Repeat steps 1-5 for each additional.

INSTALLATION

1. Remove the upper chamber of the system.
2. Open the lid and unscrew the old water filter cartridges from the upper chamber.
3. Remove the water filter from the water. Cover the holes with either your fingers or the blue caps that came with the filter, and shake the filter vigorously. Then tap them lightly on the counter to loosen any residual manufacturing dust.
4. Return the upper chamber to the system by placing it onto the lower chamber.

5. Fill the upper chamber with water and let it drain into the lower chamber When the lower chamber is full, discard the first batch of water as it may contain residual manufacturing dust, The system is now ready for use.

Warranty: 3 months

Notice: Please do not open the plastic packaging before use. Carbon molecules Will absorb moisture in the air and affect the use experience!
