SIGN POST

MODEL: DM-PK-6 \ DM-PK-8

We continue to be committed to provide you tools with competitive price.

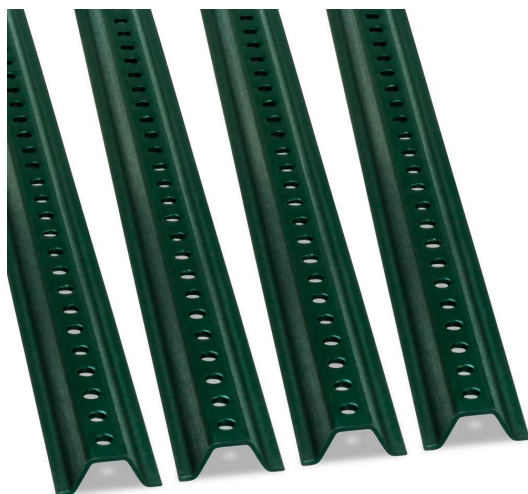

"Save Half", "Half Price" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and does not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

Warning-To reduce the risk of injury, user must read instructions manual carefully.

WARNING & PRECAUTIONS

WARNING:

- 1、 Avoid the Ladder: Trying to use a sledge hammer while perched on a ladder is an invitation for an accident. Use the stability of a pickup truck bed. Or start with a shorter post that can be driven more easily into the ground.
- 2、 Wear protective gloves when using tools to install fixed signposts, or use two people to assist with the installation.
- 3、 When using, please read this manual first, and it is recommended to keep it well for subsequent use to view.

PRODUCT DESCRIPTION

With an outdoor life of at least 10 years, our sign posts certainly are the most durable in the market. U-channel sign posts look brand new even after years of exposure to sun, wind, and weather abuse. Baked-enamel coating extends the life of posts and makes them rust-proof.

8' posts are most popular. 8' posts are the standard for most parking lots, schools, and malls.

6' posts, however are easier to install and are favored by home owners or for off-street installations. Assuming **1.5"** below-ground depth, this gives a height of **3'** between the ground and the bottom of a typical **18"** tall sign.

The hole spacing and hole size is standard across all post heights.

Model	DM-PK-6	DM-PK-8
Color	Green	
Material	Green enamel coated Galvanized Steel	
Hole	Ø10mm30pcs	
Tall Size	6ft	8ft
Packing Size	1900*100*95mm	2510*100*95mm

Product	Picture	Quantity
Sign Post		4pcs
Hexagonal Bolt M9.8*60		8pcs
Hexagonal Nut		8pcs
Flat Gasket		8pcs
Spring Gasket		8pcs
Instruction		1pcs

ASSEMBLY INSTRUCTIONS

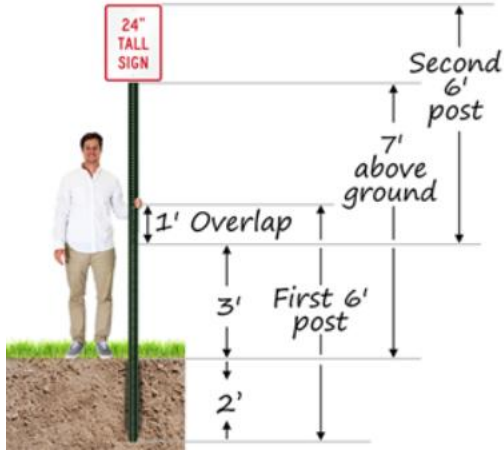

1. Unpack and take out signpost and a bundle of Screw accessories.

2. To achieve a sign height that can be seen over a parked SUV, we recommend using two overlapping 6' posts. This also avoids the 'head knocker' hazard that can occur when a distracted pedestrian absentmindedly confronts shorter post and sign installation.

3. Try Two Posts Instead: Professionals often use two overlapping 6' posts. This gives the signs plenty of headroom (thereby avoiding needless pedestrian accidents). Installing two sign, surprisingly, can be quite easy. See the next photo. Generally, we recommend from 6" to 12" of overlap between the two posts. It is not possible to overlap two medium weight 1.12 lbs posts.

4. Pounding in the Post: Posts are generally pounded into the ground (unless a sand-filled sleeve is used). For all but the shortest posts, we recommend using the bed of a pickup truck as your platform.

Although post drive caps are used by professionals installing posts every day, most users find this unnecessary.
